The Timedate Mission.

by [mbozzo](#)

Summary

The Dameians was planning to use their new time engine to invade the planet Earth in the past. They are unaware that the saints found out what they're planning, and are planning to ruin it.

Notes

This is an original story. All of the characters in this story are mine.

It was always dark in outer space. Inside the Plutonian Starbase, 2 blue skinned Plutonians were watching on the radar screen. The first on was red haired male named Tom. The second was a dark haired female named Andrian. They both wore gray bodysuits.

"I sure wish that the Dameins invade this solar system. It might end the boredom," said Tom.

"Don't worry, it's almost over," said Ardrian. Then, a small dot appeared on the screen.

"Your wish might come true. We have to arm the Starbase, just in case," said Andrian. Suddenly, the small dot was no longer on the screen.

"What has just happen?" asked Tom. Andrian doesn't have the answer..

"I don't know," admitted Andrian. Then, a brown skinned male saint named James appeared in front of them in a flash of white light. They told James about what has just happened. He gave some thoughts on what they told him.

"You did good telling me what happened. Get some rest. I'll stay here until your replacement get here," offered James. They thank him, and left. He looked at the screen. He wasn't surprised to see nothing on the screen. He knew where the invading spaceship was going.

Inside the spaceship, 5 brown furred Dameians was sending their spaceship toward Earth. The time engine did its jobs. They have traveled to the Earth year of 2001. The Earth of that time is unprotected. There is no ultrasonic barrier around Earth in that year. They couldn't contact their people in that time. The spaceship still head toward a powerless Earth. It will be conquered easily. Then, a white light covered their spaceship. When it was gone, the 5 Dameians still saw Earth and went toward it. They didn't know that the saints found out what they were planning and send them back to their time. They found out the truth when they began to feel pain from the ultrasonic barrier.

"We're back in our time. Let's get out of here," ordered the captain. So the crew turned around and fled back to their home solar system, as fast as they could. The end, for now.
